## PROJECTS

---

### Real Time Chatting Application

- A real-time chat application built using the MERN stack (MongoDB, Express, React, Node.js). The app allows users to create accounts, send and receive messages instantly, and join chat rooms. It features WebSocket integration for live updates, secure authentication with JWT, and responsive UI using React and Chakra UI. MongoDB handles message storage and user data efficiently, ensuring a smooth chat experience.

### Image Colorization Application

- Implemented an image colorization model using Python to restore colors in grayscale images. Adapted the code for compatibility with Google Colab dependencies, optimizing it for cloud-based execution. Leveraged deep learning techniques to achieve realistic colorization results

### AI-Driven Resume Analyzer

- An AI Resume Analyzer powered by NLP evaluates resumes to extract key details like skills, experience, and qualifications. It matches candidates to job requirements and provides personalized suggestions to improve resumes for better alignment with job profiles. This enhances recruitment efficiency and candidate readiness.
